

PROJECTA

FastFold

- **Easy and safe to transport.**

The FastFold projection screen comprises a folding aluminum frame, two loose aluminum legs and a loose projection screen. The cloth is attached to the front of the frame by means of press studs. The FastFold is supplied in a sturdy plastic case to keep the screen free from dust and allow easy and safe transportation.

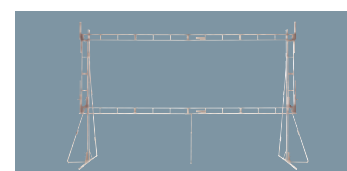

- **Flexible construction.**

Both the height and the inclination angle of the FastFold projection screens are adjustable. The standard distance from the projection screen to the floor is 50 cm, but this can be continuously adjusted to a distance of at least 15 to max. 155 cm to the floor (Truss-frame to 180 cm). This allows optimum adjustment of the projection screen to the projection room and application in question.

- **Truss-frame version from 366x488cm.**

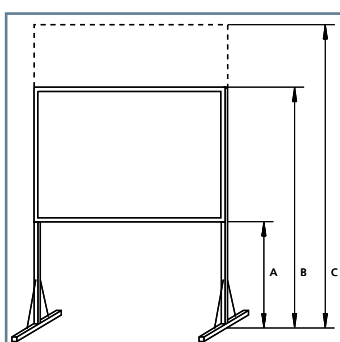

The standard FastFold projection screens have single, tubular aluminum frames, but in sizes of 366x488cm and greater the FastFold is fitted with a Truss-frame. This double sectional frame provides extra stability and ensures a perfectly flat protection surface.

Accessories:

- Loose screen (Matte white or Da-TeX) with protective sleeve

See page 34/35 for further details.
