

Quality for years of trouble-free use

The Projecta tripod screens are much sought-after projection screens that are known for their stability and durability. The complete range of tripod screens has been revamped using existing technology and new materials.

Accessories:

all models and sizes available with matching protective cover.

General features

New dark grey, steel, square case fitted with impact-resistant, synthetic caps.

A renewed, rotating tripod means it can be folded directly and safely into the right storage position.

Contrast between black border and projected image increases perceived clarity.

ProStar New

Projecta has developed a top tripod screen especially for intensive, portable use. The characteristic sturdy stand with square tube and large symmetric tripod provides unprecedented stability. Its durability and ease-of-use will make the ProStar indispensable in the rental sector and at conference centres.

Very solid, square, chromium-plated tubular system.

With integrated OHP bracket.

Symmetric rotating tripod gives extra stability.

Easy to use foot-operated leg release.

Sturdy handgrip with integrated brake for optimum portability and height-adjustment.

Format (1:1 or 4:3) directly adjustable via hole pattern.

Special transport lock prevents screen fabric damage.

Available in Matte white S and Datalux S screen fabric.

Professional screen for intensive use in rental sector and at conference centres.
